

**Harbortown Industries
Truck Dock Expansion/Renovation
28477 Ballard Drive
Lake Forest, Illinois**

We believe that one of the best ways to measure our success as a building contractor is through repeat clients. In 2001-2002, Platford constructed Harbortown's new corporate offices. We also designed and installed the manufacturing lines and storage racks in the warehouse. Since then, Harbortown has increased its focus on distribution, resulting in Platford being called to add more truck docks and renovate the existing docks.

Harbortown President/CEO Terry Rozdolsky, appreciates our efforts. "Again, I am extremely pleased with Platford's performance. I would not hesitate to recommend them to others for future construction projects."
